Creating a Risk Register

231901032

Aim

To create a Risk Register using Microsoft Excel for identifying, assessing, prioritizing, and managing organizational risks.

Procedure

1. Open Microsoft Excel and create a new workbook.
2. Create columns for Risk ID, Risk Description, Asset/Process, Risk Category, Likelihood (L), Impact (I), Risk Score, Risk Level, Existing controls, Risk Treatment, Risk Owner, Target Date, and Status.
3. Enter sample organizational risks and their details.
4. Calculate the Risk Score = Likelihood × Impact.
5. Classify risks as Low, Medium, or High based on their score.
6. Add suitable risk treatments, owners, and status for each risk.

Output

Risk register

Risk ID	Risk Description	Asset / Process	Risk Category	Likelihood (L)	Impact (I)	Risk Score	Risk Level	Existing Controls	Risk Treatment	Risk Owner	Target Date	Status
R-001	Unauthorised access to systems	Server Accounts	Access Control	4	5	20 High	Strong passwords & email access controls	Implement MFA and periodic access reviews	IT Admins	2025-10-25	Open	
R-002	Malware infection	Workstations	Cybersecurity	3	5	15 High	Antivirus and endpoint protection	Improve endpoint monitoring and patching	Security Team	2025-10-30	Open	
R-003	Data loss due to backup failure	Database	Data Protection	3	5	15 High	Scheduled backups	Test backups regularly and maintain off-site copies	Database Administrator	2026-02-28	Open	
R-004	Phishing attack	Email System	Social Engineering	4	4	16 High	Email filtering	Conduct awareness training and phishing simulations	Security Team	2025-11-01	Open	
R-005	Unpatched software vulnerabilities	Networks	Vulnerability Management	4	4	16 High	Patch management process	Perform regular scans and timely patching	Systems Administrator	2025-12-25	Open	
R-006	Unauthorised disclosure of sensitive data	HR Manager	Data Privacy	3	5	15 High	Access permissions and encryption	Conduct annual review and penetration tests	Data Protection Officer	2026-01-30	Open	
R-007	Denial of service attack	Web Application	Network Security	2	4	8 Medium	Firewall and network monitoring	Deploy DDoS protection and traffic monitoring	Network Administrator	2025-11-15	In Progress	
R-008	Insider misuse of privileged access	Admin Accounts	Insider Threat	3	5	15 High	Role-based access control	Implement privileged access monitoring and rotation	Security Manager	2025-11-05	Open	
R-009	Physical theft of IT equipment	Laptops / Servers	Physical Security	2	4	8 Medium	Security policy and inventory tracking	Enable device encryption and improve physical security	IT Administrator	2026-01-30	Open	
R-010	Cloud service outage	Cloud Infrastructure	Availability	3	4	12 Medium	Service monitoring and backups	Define RTO/RPO and disaster recovery procedures	Cloud Administrator	2025-12-01	Open	

Risk Scoring guide

Risk Score	Risk Level	Action
1-7	Low	Monitor and manage through routine controls
8-14	Medium	Additional treatment or monitoring may be required
15-25	High	Priority treatment and management attention required

Result

A Risk Register was successfully created in Excel containing identified risks, risk scores, risk levels, existing controls, treatment plans, risk owners, and status.
