

Aim

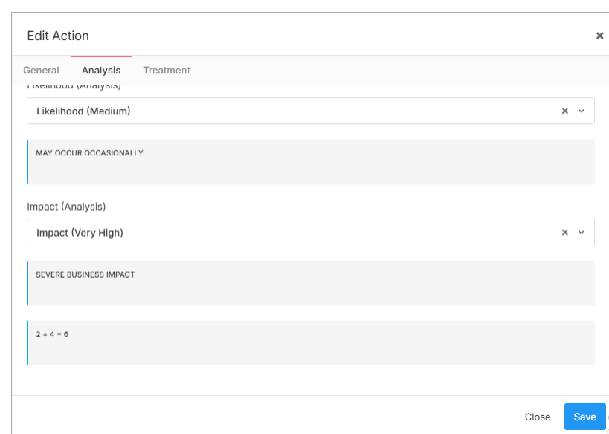

To manage identified business risks by defining suitable risk treatment plans and documenting risk exceptions using the Eramba GRC dashboard.

Procedure

1. Login to the Eramba Dashboard.
2. Navigate to **Risk Management** → **Business Risks**.
3. Select the **Business Interruption** risk.
4. Open the **Analysis** section and verify the risk assessment.
5. Review the Likelihood, Impact, and Risk Score.
6. Open the **Treatment** section.
7. Configure the risk treatment as **Accept** and associate relevant internal controls such as *Endpoint Protection*, *Backup and Recovery*, and *Firewall Management*.
8. Associate the *Information Security Policy* with the treatment.
9. Save the risk treatment configuration.
10. Navigate to **Risk Management** → **Risk Exceptions**.
11. Create/import risk exceptions with a description, requester, contact, expiration date, and status.
12. Verify the created exceptions in the Risk Exceptions register.

Output

The Business Interruption risk was analyzed with a Medium Likelihood, Very High Impact, and Risk Score of 6. Relevant controls and the Information Security Policy were associated with the risk treatment. 10 risk exceptions were also created and recorded in Eramba.

The screenshot shows a web-based interface for configuring risk analysis. The 'Edit Action' window is open, with the 'Analysis' tab selected. It contains three main sections: 'Likelihood (Medium)' with a description 'MAY OCCUR OCCASIONALLY', 'Impact (Analysis)' with a description 'SEVERE BUSINESS IMPACT', and a 'Risk Score' calculation '2 x 3 = 6'. The interface includes a 'Close' button and a blue 'Save' button at the bottom right.
